“We are ready and prepared to support our patients, employees, and community”

Dr. Shondra Williams, CEO
Dear Patients and Partners of InclusivCare,

As a community health center and community leader, InclusivCare understands the uncertainty of these challenging times. Given the confirmed community spread of COVID-19 in the Greater New Orleans area, and in efforts to protect the safety of patients, staff, and our communities, InclusivCare will be shifting operations to minimize in-person clinic visits at all InclusivCare locations. The InclusivCare team is also available to provide phone and/or telehealth consultations to serve you.

If you are having respiratory symptoms or would like information regarding COVID19 testing call our hotline number at 1-877-302-4985.

To receive ongoing updates from InclusivCare join our text message group. Text Covid19 to 1-833-410-0213. You can also have questions answered via text by texting 1-833-410-0213 and you can always call our offices at 504-341-4006

For those experiencing fever, cough, and/or shortness of breath, please call us at 504-341-4006 prior to visiting any of our clinic locations to be assessed by a member of our healthcare team. If you are having a medical emergency, dial 9-1-1.

For our Dental Patients... we will only be providing Emergency Dental services at this time.

InclusivCare’s focus is to slow the spread of the virus, protect the local healthcare infrastructure, and protect the most vulnerable members of our community. Please take personal responsibility to help stop the spread of COVID-19 by practicing personal hygiene actions to protect others.

In addition, we strongly encourage you to abide by the public health directive to practice social distancing and to minimize unnecessary social interactions in Greater New Orleans for the coming 14 days.

We understand the challenges and concerns you and your loved ones are facing and we are here to help you and our community during this unprecedented time.

In health,

Dr. Shondra Williams
Chief Executive Officer
What is Novel Coronavirus COVID-19?

Novel coronavirus (COVID-19) is a new virus strain spreading from person-to-person in China and other countries, including the United States. Health experts are concerned because little is known about this new virus and it has the potential to cause severe illness and pneumonia in some people.

How is COVID-19 spread?

* via respiratory droplets produced when an infected person coughs or sneezes
* between people who are in close contact with one another (within about 6 feet)

What are the symptoms?

People who have been diagnosed with novel coronavirus have reported symptoms that may appear in as few as two days or as long as 14 days after exposure to the virus.

- Fever
- Cough
- Difficulty Breathing

How to Protect Yourself:

- Wash Your Hands Frequently
- Cover Your Cough or Sneeze
- Disinfect Surfaces
- Stay Home if You are Sick

TELEHEALTH & COVID-19

WHAT IS TELEHEALTH & TELEPSYCHIATRY?

The use of electronic information and telecommunications technologies to support long-distance clinical health care, patient and professional health-related education, public health and health administration.

The use of the internet, videoconferencing, streaming media, and wireless communications are some of the technologies used to administer telehealth and telepsychiatry services.
